571-343-9905 | jonathan@gojsg.com | [linkedin.com/in/Jonsol](https://www.linkedin.com/in/Jonsol) | Denver, CO.

SUMMARY

Skilled Hardware specialist with 5+ years of experience in hardware engineering, IoT devices, and smart systems. Expertise in sensor calibration, system-level debugging, and rapid adaptation to emerging technologies. Adept at setting up hardware equipment and implementing automated solutions in fast-paced environments. Seeking Lab Technician position at TCS to leverage technical skills and innovative problem-solving abilities.

EDUCATION

Northern Virginia Community College

AS Computer Science

Annandale, VA

Aug. 2022 – May 2024

Awards:

- National Gold Medalist: IoT Smart Home Networks, SkillsUSA 2023
- American Institute of Physics Nominee: Wireless Communication Systems — STEM Scholar
- Official commendation by U.S. Senator Mark Warner (D-VA) for national achievement in IoT

EXPERIENCE

Vision Hardware Lab Engineer — Vision Pro

Apple Inc. (via Contract)

Sept 2024 – Present

Cupertino, CA / Boulder, CO

- Designed, built, and maintained high-precision test infrastructure for **Apple Vision Pro** including robotic fixtures and system-level test automation platforms critical for product validation.
- Led **hardware-software integration** efforts for mixed-reality systems using Bash, Ensemble, and Python, ensuring seamless data collection, firmware deployment, and continuous testing.
- Created **robotic arms** and interactive test rigs that simulate user behaviors — enabling engineers to remotely test headset interactions with high repeatability and minimal human error.
- Drove stability testing in dynamic environments: conducted **natural vs. synthetic light flicker tests**, diagnosed signal integrity issues, and ensured detection models avoid overfitting.
- Diagnosed and debugged complex **RF systems, sensor arrays, and lab hardware** across multi-disciplinary teams; directly supported cross-functional debugging sessions.
- Trusted as the **sole DRI** on labs in Cupertino and Boulder — responsible for keeping infrastructure operational and Efficient enabling Cross platform engineers to test and ship builds with confidence.

IT Field Technician / Hardware Specialist

Verizon contracted by HelloTech

June 2018 – June 2023

Washington, DC

- Designed and implemented robust test environments for next-generation IoT systems, improving reliability by 30%.
- Calibrated and maintained technical equipment, ensuring measurement accuracy within $\pm 0.1\%$ for oscilloscopes and signal analyzers.
- Developed automated testing procedures using Python and LabVIEW, reducing manual testing time by 40%.
- Integrated computer vision systems for IoT device QA, achieving a 98% defect detection rate.
- Conducted hardware planning and site surveys to optimize system performance.

Technology Support Specialist

Allegra Marketing

June 2023 – Jan 2024

Annandale, VA

- Built REST APIs to automate order-to-production flows; integrated automated data backup systems.
- Created Bash and PowerShell scripts that saved 5+ hours of manual IT operations weekly.
- Installed IoT sensors for production monitoring, improving consistency by 15%.

TECHNICAL SKILLS

Hardware: Oscilloscopes, spectrum analyzers, signal generators, automated testing fixtures, sensor calibration, IoT

Embedded Systems: Arduino, Raspberry Pi, ESP32, microcontroller programming

Networking: TCP/IP, DHCP, DNS, VLANs, VPN, industrial communication protocols

Programming: Python, LabVIEW, Bash scripting, PowerShell, C++ for embedded systems

IoT & Smart Systems: MQTT, device integration, environmental monitoring, sensor fusion

Data Analysis: Statistical analysis, signal processing, machine learning basics

Troubleshooting: Hardware and software debugging, lab testing, protocol analysis

Computer Vision: OpenCV, camera calibration, 2D/3D image processing

Emerging Tech: Basic understanding of AR/VR principles, spatial computing concepts

Certifications: Additive Manufacturing Certification, CEDIA Home Network Specialist Certificate
